

Lab5 Basic Simulation Guide

- The image below illustrates the expected appearance of the “Source” view.

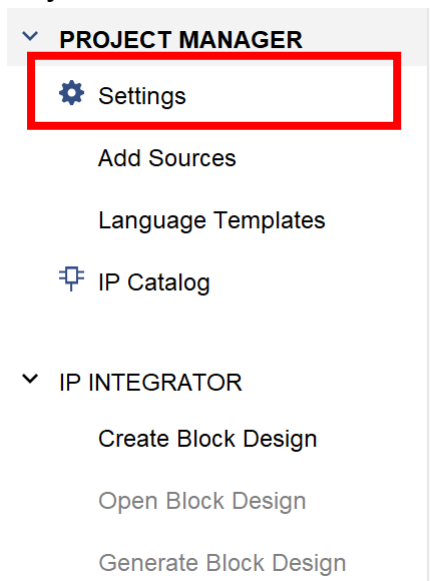

- Ensure that **input_data1.dat**, **input_data2.dat**, and **lab5_basic_tb.v** are all added to your project.

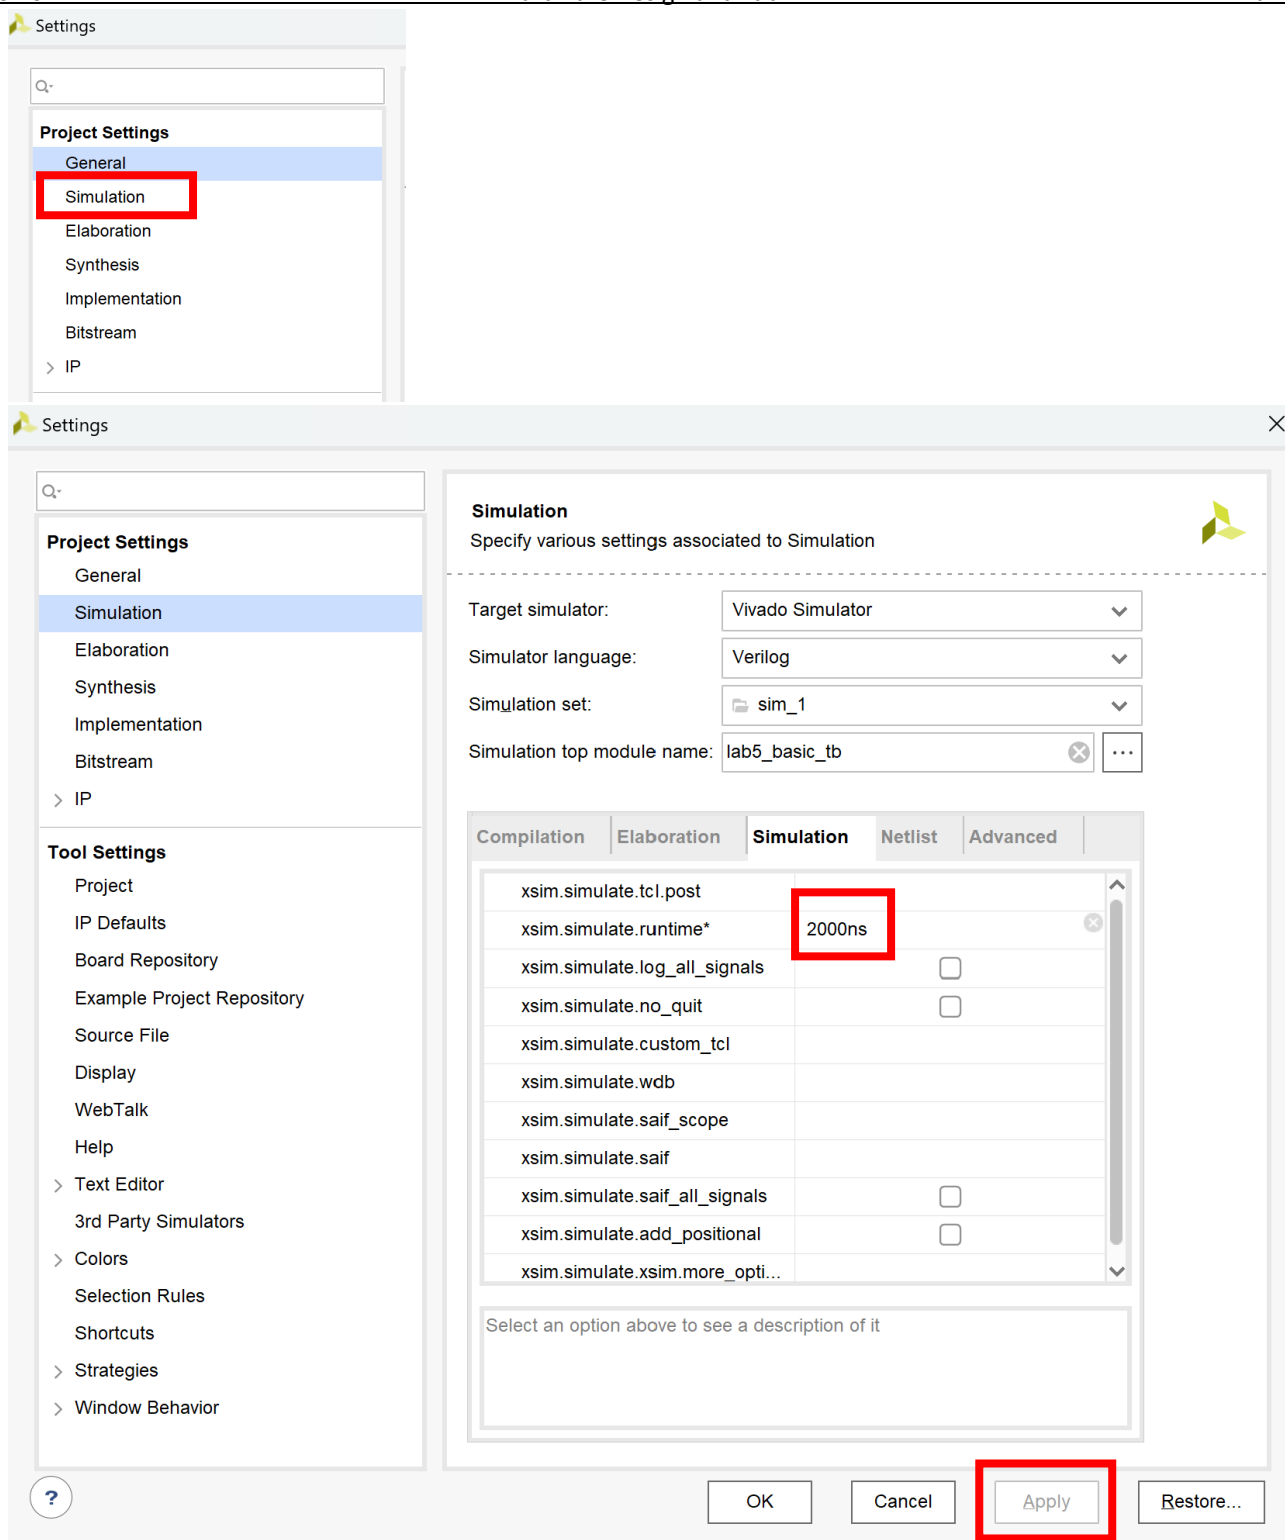

And select lab5_basic_tb.v, input_data1.dat, and input_data2.dat

- Adjust the simulation runtime to 2000ns by following these steps:

- Once these steps are completed, you're all set to run the simulation.

- If all cases pass successfully, the following messages will appear in the Tcl console.
==== Simulation Starts ====
==== Case 1 Passed (20%) ====
==== Case 2 Passed (20%) ====
==== Case 3 Passed (20%) ====
==== Case 4 Passed (20%) ====
==== Case 5 Passed (10%) ====
==== Case 6 Passed (10%) =====
- **Note:** Your score will be based on the correctness of your solution, not solely on the console messages.
